om: MUSHRUSH, GRACE J MD In 'IN' basket. Page 1

we seem to disagree on your rotations and the credit for them,
use list below the rotations you feel you did and when you feel you
d them (Inclusive dates). I will then compare them with our list.

do not count substance abuse rotations for inpatient credit for any of
e residents. Therefore, by my calculation, you are short on
-patient. I will be assigning you to inpatient for July-August.
Lean has refused to have you back because the CEC found the experience
unpleasant so we will have to work out a substitute rotation for
at time. I had assigned you to W.Rox. for part of the time because I
ought you would benefit from the liaison part of the C/L (since you
em to have difficulty getting along with women (nurses included)).
. Mufson is an authority of Liaison and could teach you a lot.
n addition, I figured it might be better for you as you would be
oser to Boston where you would be closer to the MRI.)
